VHF-UHF DIGEST

publishers' notes...

WTFDA HEADQUARTERS, P.O. BOX 163, DEERFIELD, IL 60015 USA

SUPER SKIP...while the fellow on this month's cover was at the beach watching channel two B-skip, little did he realize what was happening on high-band. Glenn Hauser, DXing from Enid, OK wasn't at the beach on June 30...after a tentative double-hop from Venezuela at noon things started to fade out. Glenn took a break and decided to check things again around 1600. In the next hour and a half some history was made as he proceeded to log definite ID's from WJCT-7, WFLA-8, WJHG-7, WPTV-9, and WTVT-13, along with tentatives of WVAN-9 and WFSU-11. Want to see what high-band Es looks like? Check out this month's PHOTO-NEWS for what may be the first photos ever made of this rare phenomenon.

MORE HIGH BAND SKIP...Glenn wasn't the only DXer to report double-hop and high band Es in June. Bob Seybold of Dunkirk, NY caught WKAQ-2 (San Juan) and KOAM-7...both on June 16 (details on page 15).

NO WESTERN TV DX COLUMN...due to a cross-up in the mails, there is no WESTERN TV DX column this month. Incidentally, our editor, Dennis Smith, indicates he would like to relinquish the column if someone else would like the job. If you are interested please contact Don Ruland, 4448 68th Pl., Kenosha, WI 53140. In the meantime Dennis will continue as Western TV DX editor, so forward all reports to him.

SPECIAL PROJECTS...on page 29 member Clarke Ingram outlines a fine project he is undertaking concerning test patterns. In addition, Ren LeBlanc, 2524 Arizona Dr., Marrero, LA 70072 is compiling a listing of TV ID logos (not test patterns). Please forward photos, drawings, ads, etc. of these logos (as actually used in programming) directly to him. Both Clarke and Ren are devoting many long hours of work for the club's benefit...help them out by taking a few minutes and postage to give them the materials they need.

NEW SOUTHERN FM DX EDITOR...while we failed to get a volunteer from the south (hello out there!), one did step forward from New England. Send all Southern (south of Mason-Dixon, east of the Mississippi) FM DX reports to: Charles Winters, 7 Parsons Dr., Beverly, MA 01915.

WTFDA MAILBOX

John Zondlo
6617 Maryland
Hammond, IN 46323

Greetings. Please note the new address above.....it'll be my permanent address until further notice. Now on to the new members:

Donald H. Allison	746 - 12th Ave. S.	Clinton, IA 52732
Richard S. Brundage	2440 E. 51st, C2	Tulsa, OK 74105
Arnold Donins	4499 Chandy N.E.	Grand Rapids, MI 49505
Douglas Downey	125 E. Tami Circle, Apt. 204	Westland, MI 48184
Richard W. Hill	3 Rugby Rd.	Binghamton, NY 13905
Robert Howard	W. Dubuque County Comm. School District	Farley, IA 52046
James E. Lawhead	825 Caddy Lane	Wichita, KS 67212
Donald Nelson	P.O. Box 201	Ravenna, OH 44266
Tim O'Malley	4660 Nix Dr.	Pittsburgh, PA 15236
Jack Powers	1819 N. Cambridge, Apt. 110	Milwaukee, WI 53202
Antonio Randaccio	381 Ouest, Rue Notre Dame, Suite 200	Montreal, PQ H2Y 1V2

Renewals: Richard Allen, Dr. R.B. Ammons, Dale Connolly, J.M. Driscoll, David J. Egan, W. Fitzgerald, Ricky Glasgow, D. Glowienka, Harry Hayes, Hank Holbrook, Iorrie Larson, R.W. Lord, Dr. W. Massie, C. Edward Mauger, Fred McCormack, B. Menke, Jerry Pulice, Bob Seybold, James F. Sokol, E.S. Strahan, J. Sullivan, Peter V. Taylor, Charles Winters, Robert Zent, John Zondlo (who?)

New Address: David J. Egan - 92 Joron - Valleyfield, PQ

New member DONALD H. ALLISON is employed at a steel fabricating plant and includes DXing and gardening among his interests. Primarily a TV DXer, Donald's equipment includes a Zenith Transoceanic 7000, a Telefunken AM-FM portable, and two Motorola TVs, one a B&W 9" portable and the other an 18" color portable.

RICHARD S. BRUNDAGE is a postal clerk who enjoys monitoring railroad calls with his Radio Shack pocket scanner.

Bruce Elving's FM Atlas is the place where RICHARD W. HILL found out about WTFDA. His gear includes a McIntosh MR-78 FM tuner, two stacked nine-element Channel Master FM yagis fifteen feet high and a rotor. Richard partakes of a rather expensive aspect of the hobby - calling many of the DX stations he hears.

The DX shack of JAMES E. LAWHEAD features a Hammarlund HQ140X, a Zenith TV, and a Panasonic FM. James is a machine operator who enjoys DXing all bands.

The FM setup of DONALD NELSON consists of a Kenwood 7001 tuner, a Sansui 777A amp, stacked Finny FM4's 31' above ground, and a C.D. 22 rotor. As far as TV goes, Donald has a Channel Master 1110 antenna 31' above ground topped off with an 8 bay stacked bow tie and an Alliance V-100 rotor. Donald is seeking advice on the types of filters that can be used in FM receivers.

Pittsburgh member TIM O'MALLEY learned of WTFDA through Clarke Ingram. Tim pursues DX with a Motorola 12" B&W TV, an RCA 19" color TV, and a Carnegie 2970 multi-band radio. Tim is a DJ for Baldwin High School's radio station "Zero Point".

WN900A, better known as JACK POWERS, DXes with a Nova Tech shortwave receiver, a Kenwood FM receiver and a Zenith TV with an outside UHF antenna.

ANTONIO RANDACCIO of Montreal is interested in 144 MHz DX, both QRP and QRO, as well as FM and TV DX. His equipment includes a Rhode Schwarz receiver and a Sony CRF 230. Antonio's call, by the way, is 1IRBA.

Tidbits.....

Dave Egan recently installed a new antenna system at his new address. His equipment includes a 68' tower, a Zenith rotor #867-1005, a 7' Channel Master UHF dish #4251A, and two VHF "Jets".

San Francisco member Harvey B. Woodworth is interested primarily in TV-FM DX, but the current economic situation is hampering his efforts to upgrade his equipment. Harvey's gear includes two Zenith products, a Trans Oceanic for shortwave and a 17" B&W TV, both hooked into a Panasonic 7412 AM-FM multiplex tuner so that better audio from the receivers can be comfortably monitored through the stereo headphone jack on the Panasonic receiver. Until he can upgrade his FM-TV equipment, Harvey will be devoting his DX time to BCB and shortwave.

Rich Eddie of St. Louis would like to receive member's suggestions on the best types of outdoor FM antennas and rotors to buy. He would especially like comments on these items from members in high station density areas. Rich's address is 152 W. Rose, St. Louis, MO 63119. His equipment currently includes a Harman-Kardon 330A AM-FM receiver connected to Archer indoor FM rabbit ears and a Magnavox B&W portable.

BCB, TV and FM are the main areas of DX interest for East Chicago, Indiana, member Michael Hogan. Mike will complete his work for a B.A. in psychology from Calumet College in December. He will begin graduate studies in psychology in January. Mike's DX gear includes a Sears Silvertone AM-FM receiver and an Emerson TV.

For Sale: Antonio Randaccio (address listed with new members) is offering a cavity tune 74 MHz lo noise high-gain preamplifier. Please write to him for more information on price, etc.

Well, I guess that about wraps it up for another month. If you have anything to share with the members concerning receivers, new equipment, personal data, etc., please drop a line this way. See ya.....jz

MICROWAVE TV-DX?

As many TV-DXers may have noticed, there is now an increasing use of television at microwave frequencies (mostly in the 2500 MHz band). Applications include the following:

Private Channel TV -- Local transmission of educational, religious, and pay TV broadcasts. Pay TV broadcasts are scrambled.

Satellite down links-- Signals from such high power satellites as ATS-6 and the Canadian ANUK penetrate many areas. More of similar design are sure to follow.

Broadcast links----- For studio to transmitter applications, or remote site to studio. Usually much higher in frequency and using very directive antennas.

All this points up to a possible new horizon for TV-DXers. Surprisingly, many microwave systems do not use highly directive antennas for transmission, and should be receivable over a wide area. One new microwave pay TV company is advertising a 35 mile range. Microwave signals are also affected by tropo and ducting however, making DX a real possibility. Unfortunately, many video microwave systems use FM modulation for video as well as audio, making it impractical to use a simple converter with a standard TV receiver. What is needed is a complete receiver which has a video output signal. In the past two years, the cost of semiconductors for microwaves has greatly been reduced. In theory, it could be possible for a lowcost video microwave receiver to be constructed (either by a manufacturer or a scratch builder). The problem is finding a DXer with microwave experience that could make a prototype unit. Are they any microwave design engineers in the house?

MEMBERS' REPORTS AND COMMENTS

Exciting things are being done with computers, and I'm now better able to organize members' reports as they come in. Most of them are summarized above, leaving mainly miscellaneous remarks for this section. More about computers later, but now...

To receive WQGL's slow-scan TV picture it takes a \$4,000 signal expander made by Colorado Video Corp.; the special FM-transmitted pictures will initially be picked up only by various CATV systems in upper Michigan and retransmitted. WWJ-FM 97.1 Detroit changes format somewhat to "music in touch with today." It is said to be Detroit's most popular FM and third among local AM and FM stations. WNUF 100.7 New Kensington PA continues playing big band records in \$, although part of their record library was destroyed by a fire. WGMS-FM 103.5 Washington DC had a major fire, but most of records (classical) escaped destruction. WQXI-FM 94.1 Smyrna-Atlanta GA has a telemetry SCA sounding "like a pure tone with bird chirps superimposed on it, which is quite startling when heard for the first time." But not all SCA-telemetry stations have any distinctive signal, so I will continue to leave them out of the Atlas, but will be referring to them in the FCC-FM Column.

North Pole AK, where an FM's been applied for, is about 15 mi. SE Fairbanks, with the town of College (home of KUAC *104.7) four miles west. XHPL Ciudad Acuna still on old frequency (98.5; supposed to go to 99.7; all other Mexican stations are believed to have switched). However, on a recent skip outbreak XHPL alone among three Mexican-received stations announced with call letters; the others with slogans. It takes much more space to list slogans than calls, so I wish pressure could be put on these stations to use their call letters, too!

Cedar Rapids' KCKK-FM *88.3 is on the air 6 am to midnight 365 days a year. KOYE Laredo TX still on 92.7, not yet having increased power and moving to 94.9. KEHG-FM Fosston MN's manager not concerned when called and told the station is on 107.7, instead of 107.1, and who knows if even the FCC would move against them and the other off frequency offenders? One correspondent wonders if WQXA York PA and WKTK Baltimore (licensed Catonsville) MD have directional antennas, since he measured the distance between them as only 50 miles! Both are on 105.7. Mystery: "WLBE" heard by a FL reporter during a skip opening to Ohio, etc. area on 99.9 [the WLBE call's used to be in Leesburg FL, but who knows where the calls are now?]

Paul Petosky, Munising MI, plans to apply for a translator to cover the town of Grand Marais MI: the WQXO 98.3 signal sails right over the town, but not down where the folks live.

WJPD-FM 92.3 Ishpeming MI not in stereo; they've had problems with their microwave to the transmitter, but are announcing (fradulently) as in stereo. KEZZ 94.3 Aitkin MN not in \$ for now; giving legal id's for W269AA 101.7 Grand Rapids, KEZZ's translator.

KMFE 101.7 Emmett ID has Intermountain Network news at times. Working at a commercial station, Bill Frahm saw skip on the TV monitor at KBOI Boise. "The switcher and I spent most of the morning of June 22 DXing. He missed several commercial breaks while trying to ID what turned out to be WCCO-TV 4 and KSTP-TV 5 in MN. I made him super an ID on ch. 2 every 15 min. during the opening so it would be easy to ID!" WNWS 97.1 New York now all-news, NN.

NBC has now begun its new NN (News and Information Service), affiliating several stations who will agree to carry only news and talk programs, including several FM's, none of which are expected to continue stereo. All known NN FM affiliates have been listed in this section.

Andy Bolin, 709 Lincoln Ave., Charleston IL 61920, would like to hear from any "major" FM DXers interested in swapping taped copies of their best DX. He's now at 1475 FM stations heard!

Adding to information in the June VUD, WPRO-FM 92.3 Providence RI has been top-40 for a year now, \$; while WWON-FM 106.3 Woonsocket RI is automated beautiful music, \$. That writer wants me to make a distinction between so-called "beautiful music" and "middle-of-the-road" stations, both of which I classify as m. I don't care to, because the difference is more in the nature of presentation rather than between the types of music. The b station may have less announcing and more instrumentals, while the m station may have announcing after every record, and have somewhat more vocals, but the difference as I see it is one of emphasis, not one of kind. Expected on the air this fall is WOTB 107.1 Middletown RI, \$. WKRQ-FM 90.9 Mobile AL is Hit Parade, \$, carrying the CBS Mystery Theatre nightly at 7:05, Garner Ted Armstrong at 8:05. ABC-FM news usually, but CBS news late at night. On air or testing: KALU *90.7 Langston OK 10 watts heard.

KQRS-FM 92.5 Golden Valley MN conducts its special test with frequent id's after 1 a. m. CDT August 12 to coincide with the annual Perseids meteor scatter occurrence. Troops may also be in. Send reports to Terry A. Stripsky, chief engineer, ZIP 55422. KXTC 92.3 Glendale AZ Latin jazz Sunday nights 10 to 2; their normal format is m. WQSR 102.5 Sarasota FL is lead for Tampa-St. Petersburg among adults 18-34 among all AM and FM stations, says Pulse and ARB.

Now, a word from your friendly computer service. FM data cards are now keypunched for all stations on the air and authorized in the US and Canada, as well as FM station applications! If you want the very latest information (updated to the day it is sent out) and more complete than in the Atlas (giving coverages, for example, to the 1000 and 50 microvolt/meter contours), then you might want a computer list for your state or region. These low rates are for WFTDA members, and are good through August 31. Entire deck (U. S. on air and authorized), about 4000 cards; \$8 + \$1 postage. One state or group of states (sorry, no partial states) or all of Canada: \$1 post-paid per state. Listing of applications — about 500 — \$2.50 postpaid (add .50 for Canada). Minimum order \$2.00 please. Applications do not show facilities change requests, just applications for new stations. Here's what part of the applications print-out looks like: (Order from "FM Atlas Co.," Adolph MN)

Get in touch with MEXICO As those of us who have been getting net-5 on ch 2 and 3 have surmised, Televisa has juggled its networks around. Now, thanks to a June Tele-Guide forwarded by Ken Simon, we can unravel some of the mystery. You can now update your last list and/or the TV Station Guide. Net-8 has been cut back to but 3 relays: XHPM-2, XHP-3, XHTQ-9 (ex-net-5). Net-4 remains only on XEX-7, XHAL-10 and 12 in Huatan, Mich. (prob. low power). Net-13 now exists, via many 11s, 12s, 13s, and 4s in Chihuahua and Yucatán (not Televisa); changes in Net-2 include XEHL-6 (formerly on 2 in Guadalajara, with XEHL 1); on ch 5 in Cd. Guadalupe, Chih.; ch 6 in Cd. Delicias, Chih. (These last two could be translators); ch 14 in Mexicali, B.C. (and I've seen XHAQ-5 as 1). Net-5 takes over much of the old net-8: Aguascalientes-13, Acapulco-4, Cd. Victoria-13, Culiacán-13, Zamorano-5, Guadalajara-9, Hermosillo-10, Las Lajas-5, Los Mochis-12, Mazatlán-7, Monterrey-6, Parral-3, Saltillo-7, Tampico-9, Tepic-4, Torreon-2, Zacatecas-3. Also listed is Chihuahua-2, but I saw XNCH with L, announcing net-2 also, not net-5. Watch out for "Televisión y Vd." Mon-Fri 11:00-11:30 CST, when all four nets are in parallel!

August 1975

Deadline: 10th

Strange as it seems, B-skip activity in June was both spectacular and disappointing. Spectacular, because of high-band Bs openings. Disappointing, because in spite of the fact that there were only three days without Bs reported by Eastern DXers, MUFs were generally lower than usual for June. There didn't seem to be very many good evening openings in comparison to past years, either. But still, there were some really exceptional days. On the 16th, Bob Seybold had an opening that reached channel 7, and saw KOAM-7 Pittsburgh KS. On the same day, Bob had double-hop reception of WKAQ-2 San Juan PR. The big Bs news this month will really be found in other report columns, in the form of a once-in-a-lifetime Bs opening that reached ch 13 video! DXers in parts of Florida and the Carolinas should have been able to catch high-band Bs on June 30, but nothing has been reported to this column to indicate this yet. Note Bob Seybold's super tropo catches on the morning of July 1!

June B-skip dates:	1	2	3	4	5	7	8	9
number of reporters	8	6	9	1	3	1	9	6
MUF to at least:	4	6	3	2	3	2	6	3

EASTERN TV-IX

August 1975

Jim Harkimer 3255 South Drive Caledonia, New York 14423 (EDT)
 "Here's my first report. I'm 28, have been a member for a couple of years. Since leaving the Air Force I've finally started building a decent setup: 1960's Zenith 17" B/W, Winegard SCX-26 10 element lowband yagi, and AR-22 rotator. Next comes a highband yagi, and finally, something for UHF. QTH is 16 miles south of Rochester, approx. 60 miles east of Buffalo."

"A very good month here that brought in 7 new stations. Those Cuban ones on the 13th & 17th were only displaying a test pattern with the word 'CUBA' on them, therefore no ID, but a couple were on channels that I haven't before seen from Cuba. A long awaited opening from North Dakota on the 18th brought along 3 new loggings. A few words of praise are due for the WTPA TV Station Guide. It is a must for any TV Dkr. With it I was able 2 Cuban slides I have had for 3 years. Happy DXing to everyone."

"As for Ma, I would note seeing CBGAT4-2 with its 5 watt transmitter 3 times & getting a polaroid of the ID among my all-time DX thrills. I will rephoto my print for better contrast & send it in some day. Total now 213 (84 since April) plus 1004 on FM also. I am home most days writing my PhD dissertation so easy to keep tabs."

CENTRAL TV-DX

William J. Draeb
Ellis St. Rt. #2
Kewanee, Ill.
54216

Deadline: 12th

Lots of Es during the past month. Most openings were hard pressed to get past ch. 4 on the muf though. Yours truly did manage to snag two new ones though. Tropz still not up to par but no signs of improvement.

Richard Peary: Apt. 5A, 1914 University, Tusculoosa, AL 35701 EST

6-22 Es 1100 KMGH-2 Denver, Co.

6-22 Es 1130 KVCU-5 Cheyenne, Wyo.

"After a year of trying to get DX through CATV internet I finally got some good E-skip. There was some good skip on FM but couldn't i.d. any of them." (Thanks for the report Richard. I hope the CATV internet service doesn't bug you too much. I, fortunately, am not plagued with that kind of problem - wd)

Robert Zent: 1835 Fruit, Huntington, In. 46750 EST

"This will be my first report. I've been DXing for almost five years and have been a member of WFFA for a little over a year. Besides TV and FM, I also like to DX the AM broadcast band. My equipment includes a Winegard GW-1001 antenna with a 3T American 75 pre-amp, at about 50 feet, connected to a Sony Trinitron color receiver.

This report covers 6-8-75 to 7-1-75 and time is EST. June has been a fantastic month for E-skip here. I had 9 new loggings, chiefly on 6-18 and 6-22. MUF reached at least 103.7 on the 18th and at least 96.3 on the 28th."

PHOTO-NEWS

Jim Alexander
8 Court Knolls—
New Hartford
New York 13413

August 1975

This month's column contains two types of unusual photos. Let's get started with the first -- test patterns from both of Cuba's TV networks...

ICR-TV-6 Havana, Cuba (ex-CMQ)
1370 mile Es 6/17/75 (PG)

Telerebelde-3 (1) Holguin, Cuba (ex-CMKJ)
Es January 30, 1975 (JG)

To the left is the test pattern used by the ICR network in Cuba. This network's ID slide has appeared previously in the VUD (see Dec. '74 VUD, page 29). For details of the network's stations, see Ken Simon's list on page 39 of the July '74 VUD. If you've seen this test pattern, check the list to see which station(s) you've seen. To the right is what is suspected to be the Telerebelde network's test pattern. If you have seen this TP and know for sure what it is, Jim Gould (and your editor) would appreciate hearing what station it is. Telerebelde is Cuba's other TV network, and is also detailed in Ken Simon's list of Cuban television.

Now, what should be for many a first look at HIGH-BAND E-SKIP:

WJCT-7 Jacksonville, Fla
1,020 mile Es 1701 CST June 30, 1975 (GH)

WFLA-8 Tampa, Florida
1,085 mile Es 1649 CST June 30, 1975 (GH)

Identical-offset CCI on KETA-13 from WTVT-13 Tampa, Florida
1,085 mile Es 1719 CST June 30, 1975 (GH)

Clarke Ingram passes the word that the fifth photo in the European TV feature (January '75 VUD page 35) "is from Intervention, which of necessity must be the Polish side of the Russian network." Thanks, Clarke -- you've now identified all six photos in that feature for us (for the other IDs see April '75 VUD, page 26).

MANY THANKS TO THIS MONTH'S CONTRIBUTORS FOR SOME REALLY SPECIAL PHOTOS:

FG = Paul Gaines, Detroit, Michigan

JG = Jim Gould, Kokomo, Indiana

GH = Glenn Hauser, Enid, Oklahoma

73 and good BK,

Jim

6-30 Es to Tx., N.M. deep into FM17-2300.

"Because most Es are usually snow-free with rapid fade characteristics, I have stopped listing the signal quality. Where it is of minor concern to me it will probably be easier for you to omit the 5555 from each Es logging. Because tropo can and usually do have wide variations in signal quality, and it is indicative of the quality of the tropo opening, I will continue to list the signal quality of tropo signals.

VHF is still in poor shape from lightning strike; I would estimate about a 4-6db loss or its equivalent, in station Tx. I re-laid the 3-band Tongue hybrid splitter combiners used to combine the array and it helped the signal, but I lost the deep nulls off the main antenna lobe. The Channel Master hybrid splitter used as the chief suspect. I re-connected the lossy setup with the 3 splitters to get the nulls back. Meanwhile, I am waiting a good 4-way splitter-combiner from Calco, what they use to combine antennas. I'm not totally convinced that the problem (signal loss) is in the combiner, but I can't get to the antennas. I've made 5 trips up and down the tower and each time it takes me about an hour to get over the shakes. I hope I can get this thing fixed soon, it's a minimum of climbing. I hope you fared better than I with tropo thru June. It was a let down! (Not much in the way of tropo up to this day Jim. I can imagine your problem as I had similar ones and they're not easy to fix. Good luck with fixing your setup; I'm sure you're going to need it.--wd.)

I still have a few more miscellaneous items I would have liked to get in here this month but time is running short and so is the space on this page.

Congratulations to Glenn Hauser who saw Es through ch.13 on 6-23. He saw other hi-banders via Es between 6-18 and 6-31. I've yet to see my first hi-band Es.

If DK keeps rolling in and you have a lot to report, set it in early. 73's

SPECIAL PROJECT NOTE

from Clarke Ingram

Dear WTFDA Members:

As a fellow DXer, I would like to ask your assistance in a long-term project I recently began.

I am attempting to obtain photographs of the test patterns of television stations in the United States and Canada. You can help in this effort by photographing the test patterns of your local and semi-local stations, as well as those of any DX stations you might be receiving.

The purpose for this effort is to establish an all-inclusive test pattern guide which would be available to the DXer and which would aid in solving many test pattern uniDs. Such a guide would be particularly useful to the meteor scatter DXer, who is often confronted with brief glimpses of barely recognizable custom test patterns.

Before you go running for your camera, however, a few words of importance. If this is your first attempt at TV photography, remember not to use a flash, it will only blot out the TV picture with its own reflection. Try to fill the entire photograph with the test pattern, but beware: when at close angles, you may have to tilt the camera severely in order to center the pattern. WTFDA's Beyond Shortwave has some other helpful notes concerning TV photography. Incidentally, I would prefer that you use black and white film when taking these pictures, although color photos are acceptable if there is no alternative.

If one or more of your local stations uses unidentified color bars, you needn't bother photographing them, merely indicate in your letter the number of bars in the pattern (usually seven or eight). If the station uses unidentified three-fourths color bars, please describe these using the format (a-b-c), where "a" is the number of bars in the color bar section, "b" is the number of the bar under which the white square begins (for example, 2½ if the square begins under the middle of the second bar), and "c" is the width of the white square in terms of the color bar width (1 for single bar width, 2 for double, and "1+" for any width in-between). For example, the pattern below would be classified (7-2½-1+).

Please do send photographs of IDed full or three-fourths color bars, however, as innumerable differences in ID placement, size of logo, etc. are in existence. There are also so many variations of supposed 'standard' patterns such as RETMA and SMPTE that I ask you to photograph these as well, whether IDed or not. In addition, it would be most helpful if you would note the times at which each test pattern is aired (both on weekdays and weekends) on the back of each photograph, in your local time.

Here's your chance to utilize those DX-preventing locals for the betterment of DXing and the WTFDA. This is a project in which all members, from novice to veteran, can participate. If you have any questions, feel free to write me at the address below or call me at (412) 892 2497. Your help in this matter is appreciated.

Sincerely,

Clarke

Clarke W. Ingram

I Everyone, its time again for another column, and DX conditions this month see to be very good. I am in the process of upgrading my antenna system and adding a preamp. Note to all reporters: when sending in your reports if you want to please send in some comments on the current DX conditions and how conditions are compared to previous years. This, of course is optional. Comments will be included in a small paragraph in the column each month. Thanks to all of the reporters, 73, and to all God LX (Ed)

Peter Sawatzky - 7 Old Chicopee Dr APT 708 - Kitchener Ont. M2A 2V3

...Tony Ward of Guelph and I attempted putting my FM antenna and a UNF super flying arrow on mechanical roof at about 100ft. height. The results were phenomenal - close to 200 FM stations at once and 200 miles IF, all under "deadband" conditions. Unfortunately, 2 days later the entire thing semi-collapsed due to a severe ice-snow storm. There was some damage involved with superintendant, lawncare, building aesthetics, etc., that the idea of putting it up again were scrapped. Right now I'm using the same Archer Twin Drive FM Antenna which I was using at my previous location only now it's indoors (believe it or not) on a tripod. It doesn't do much for the looks of the ant. but as a Dyer I can tolerate it.

FM NORTH *** AUGUST 1975

Peter Sewitzky - 7 Old Chicopee Dr. Apt. 708 - Pittenenger, Ont. N2A 2V3

Tuner - Heathkit AJ-15

William C. Dickerman - PO. Box 786 - Williamsport, PA 17701 (EDT) 3/25-6/23
DX:

This report covers new loggings from 3/25 to the present. I took a week's vacation from June 21-27 to give me some time for FM-DX. I got 3 "new" stations, but heard no Es.
 3/25 0907 WIOQ 102.1 Philadelphia, PA w/rock lrx, "Music Radio WIOQ"
 6/22 1059 WGLI 106.1 Corning, NY. w/"Sacred Heart" Program.
 1831 WTAE 96.1 Pittsburgh, PA "Great American Mx Machine" (165)
 6/23 1331 CJRT 91.1 Toronto, ONT. (206)

In addition I also heard 2 new area station which recently commenced broadcasting: WGSU 88.9 Selingsgrove, PA, and WJMH 98.3 Mifflinburg, PA. I think WGSU (Susquehanna University) is off for the summer now. Total FM stations heard to date on my Zenith R7000Y1 is 114.

John Ebeling - 9209 Vincent Ave So. - Bloomington MN 55431 6/18-6/26

I must take back some of the remarks I made last time about this being a poor year -- the month of June turned out to be the best Es month I have seen in years. Even had some short Es from Colorado, which I had never seen before. New stations are underlined, those stations that had an active 67Khz SCA service when I recieved them are noted. (w/an asterisk)

 May-June Es much improved over last years'

Michael Hogan - 4811 Euclid Ave. - East Chicago, IL 46312

With summer courses and a two week vacation, not too much DXing has been done. So I have taken some time to do some experimenting with a new antenna system, and knowing my luck I probably missed a few good openings when I was changing the antenna system which took me a couple of weeks. So maybe now I can DX a few of the tropo openings which seem to be quite frequent here. 73's

antennacraft and the FM ATLAS

Combine to bring you the ultimate FM antenna!

GFM10: An attractive, gold-anodized ten-element yagi, 120" boom. It's recommended for FM DXing, as well as general listening to the best in FM stereo, SCA, and monaural FM.

Easy assembly; rugged square boom construction; reinforced cradle mount. Suggested list price is \$34.95; dealer cost is \$20.98. Order by mail and pay only \$19.50 postpaid [UPS] total. No taxes or hidden charges!

Order two or more and save even more! Two or more \$19.00 each postpaid. Buy two for stacking, or for use in different locations. Stacking harness for FM: \$2.00 postpaid.

Now's the time to upgrade your FM antenna system at these direct factory-to-you savings. Antennas are shipped direct from Iowa factory to your home anywhere in the 48 contiguous United States and the District of Columbia. Allow four weeks for handling, shipping. Send remittance to "FM Atlas Co.," Box 24, Adolph MN 55701.

Other relegated K.C. stations with S
From now on I'm living with a lightly damaged antenna. When the Friday the 13th tornado came over my house, a large twig blew by and snagged on a rod, bending it down to the rotor. The tremendous wind also blew off most of the standoffs. I straightened the rod only half way up—no more because I was afraid it would break off, sensitivity seems slightly reduced. Now if a bird doesn't sit on it.....
I'm thankful everyday that the tornado spared its full fury until it got out of town where it, unfortunately, finally touched ground and struck a trailer park, scattering it across the countryside along with a few wooden homes.

5 Es 1224 Brief Es on 88.5, no ID.

Es is much improved over last year when I caught only one good opening. Stillwater was very lucky about the tornado, even if it was Friday the 13th. Total now 447.

Pat Dyer, 5315 Silvertip Drive, San Antonio TX 78228 (June 8- July 8) (CST)

Equipment: Allied 426; Hallicrafters SX-62 with International Crystal SAX-1 pre-ampl;

Archer V-100 TV/FM antenna @ 20 ft. w/rotor.

As far as the number of loggings go, June 22 was the best day of the year - and perhaps the best since June 5, 1973. June 22 MUF was over 106 MHz for some 6 hours. June 30 might have provided more loggings if not for the 2 hours I spent looking for VOR's and higher MUF's. After seeing it reach Ch 7 the 88-108 MHz band will never seem quite the same again. The June 30 MUF went from just Ch 2 to over 108 MHz in less than 20 minutes, having reached 88 MHz in less than 10 minutes. 73, Pat W4STYX

Steven C. Wiselblood, 707 Iowa Way, Santa Maria CA 93454 (10 June-14 July) (PDF)

Es has been excellent throughout June, and made a comeback on July 11th, when there was no for over 4 hours on PM. The deadline for this column is the 10th of the month and I will use the same format as Roger did. I would like to thank Danny Buntin for sending me the newspaper of the tornado in his city. Here are a few of the abbreviations used here:

RR-Rock music/Progressive and/or Hit music
 EL-Easy Listening
 CI-Classical
 ID-Identification
 nx-Music
 (tentative stations may also have a question mark after the call letters)

new stations: Underline the call letters
 stations by a new mode of propagation:
 a dashed line will appear under the call.

Michael Hogan, 4811 Euclid Avenue, East Chicago, IN 46312 has found the 162 MHz NOAA weather station signals to be very useful in determining the overall tropo DX conditions on hi-band VHF. The Chicago station (reported to be planning a power increase) is very audible to 25 miles. He would like to hear from others who have conducted similar observations with the NOAA signals.

Now, my loggings. Hallcrafters SK-62 with 30' long wire at 12' (nw-se run); * Allied 426 with Archer V-100 at 20 feet; all are Es, GWT used, new underlined

lack of many loggings again due to many days of TV & Pa MUF's

Ottawa 10.7-cm solar fluxes and Fredericksburg (VA) A-indices for June

1: 69 17	8: 66 5	15: 66 9	22: 68 6	29: 77 16
2: 71 23	9: 66 6	16: 69 15	23: 71 4	30: 76 21
3: 69 13	10: 67 6	17: 68 8	24: 74 2	
4: 68 14	11: 66 14	18: 68 10	25: 76 3	avg: 69.7
5: 67 9	12: 66 21	19: 69 9	26: 77 6	
6: 66 13	13: 66 16	20: 70 6	27: 79 5	lowest month yet for
7: 66 7	14: 66 11	21: 67 9	28: 78 3	Cycle 20 decline

However, July 13 flux was 88, the highest since last December. So, one still can not safely say just how close to the solar low point we are. These flux data are not corrected for the variable earth-sun distance (apx 91 million miles in January and 94 million in July) so the latest spurt of activity would cause even higher fluxes at other times of the year.

The Swiss and American sun spot counts for April reached the lowest averages since the bottom of the last cycle (Oct 1964). However, the smoothed averages are running relatively high yet.

73. Pat
